

Model 550

80.26.2506

RONDA® 550 is a robust wet cleaner with a large suction capacity. Suitable for vacuuming large quantities of water, e.g. for disaster services, emptying of vats, cleaning of basins, draining of cellars and vacuuming of sludge.

The pump transports the water continuously. By less water the cleaning can also take place without the pump being switched on. The liquid is filtered in the filter bag, and particles >0.5 mm are retained while the rest is pumped out. Easy and effective.

RONDA® 550 is equipped with 2 suction motors, which can be switched on separately to reduce any possible foam creation.
